SUMMARY

I am an AWS & DevOps Engineer with 3.5 years of experience in AWS cloud infrastructure, CI/CD automation, and production support. I have hands-on experience with AWS, Terraform, Jenkins, GitHub Actions, GoCD, Docker, Kubernetes, and CloudWatch, along with troubleshooting, monitoring, and Jira-based infrastructure tasks. I focus on improving cloud reliability, automation, and operational efficiency.

EXPERIENCE

Cloud & Infrastructure Engineer

07/2025 - Present

L&T | Client: ABSA – AWS Cloud & DevOps Operations

- Managed real-time AWS infrastructure requests and production support through Jira tickets.
- Troubleshot GoCD pipeline failures and handled application deployment and release issues.
- Administered CloudHub applications and coordinated infrastructure requirements with application teams.
- Implemented ECS monitoring and alerting based on application operational requirements.
- Executed AWS account decommissioning by validating resources and performing controlled cleanup through pipelines.
- Investigated CloudTrail logs to trace AWS resource and IAM-related activities.
- Performed AWS infrastructure provisioning, configuration, and troubleshooting across environments.
- Handled operational readiness activities, including infrastructure validation, dependencies, and deployment requirements.

DevOps Engineer

10/2022 - 06/2024

Cognizant | Client: FEDEX – AWS Cloud & CI/CD Automation

- Managed AWS infrastructure and Jenkins CI/CD pipelines.
- Provisioned AWS resources using Terraform and Infrastructure as Code.
- Deployed containerized applications on Docker and AWS EKS.
- Implemented blue-green and zero-downtime deployments.
- Configured VPC, VPN, VPC Peering, IAM, and security controls.
- Set up CloudWatch monitoring and proactive alerts.
- Supported on-premises to AWS migration and infrastructure optimization.
- Troubleshot AWS infrastructure, application, and deployment issues across environments.
- Managed Linux-based EC2 instances and performed system-level troubleshooting

Linux System Administrator

08/2024 - 12/2024

Cognizant | Client: CIGNA – Linux Administration & AWS

- Administered Linux servers and AWS environments.
- Managed Kubernetes workloads and application releases.
- Implemented centralized logging using Fluentd and Splunk.
- Configured Apache and Nginx web servers.
- Performed backup verification and recovery readiness activities.
- Troubleshot infrastructure and application issues to maintain SLA.

EDUCATION

B. Tech

Dr. M.G.R. Educational and Research Institute

08/2018 - 05/2022 | Chennai, India

KEY ACHIEVEMENTS

Key Achievements

Streamlined CI/CD pipelines reducing deployment time by 40% and improved provisioning efficiency with Infrastructure as Code

Optimized Storage Costs

Reduced cloud costs by 25% using optimized S3 lifecycle policies.

Improved Monitoring and Alerts

Led cross-functional teams in AWS cloud migrations, fostering collaboration and reducing project delivery time by 20%
